

Federal Emergency Management Agency

Washington, D.C. 20472

JAN 6 1983

Frank G. Pagano, Chief
Emergency Preparedness Licensing Branch
Division of Emergency Preparedness
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Pagano:

This is in response to your request of April 12, 1982, that the Federal Emergency Management Agency (FEMA) review the draft public information sections of the emergency plans for the Perry Nuclear Power Station. Your request was not received by FEMA until September 28, 1982, which resulted in a delay of the review. Enclosed is a preliminary review of the Perry Nuclear Power Station booklet, brochure, and articles developed to date. As indicated in the review, additional information must be developed and evaluated before the information package can be accepted as adequate.

If I can be of any further assistance, please let me know.

Sincerely,

A handwritten signature in cursive script, reading "Richard W. Krimm", is written over the typed name.

Richard W. Krimm
Assistant Associate Director
Office of Natural and Technological
Hazards
