

NOV 16 1982

Florida Power Corporation
ATTN: John A. Hancock, Vice President
Nuclear Operations
P.O. Box 14042, M. A. C. H-2
St. Petersburg, FL 33733

Gentlemen:

Subject: Report No. 50-302/82-23

The NRC Systematic Assessment of Licensee Performance (SALP) Board has completed its periodic evaluation of the performance of the subject facility. The Crystal River Unit 3 facility was evaluated for this period May 1, 1980 through June 30, 1982. The results of the evaluation are documented in the enclosed SALP Board report. This evaluation will be discussed with you at your offices in St. Petersburg, Florida, on November 24, 1982.

The performance of your Crystal River Unit 3 facility was evaluated in the functional areas of plant operations, radiological controls, maintenance, surveillance, fire protection, emergency preparedness, security and safeguards, refueling, and licensing activities.

The SALP Board evaluation process consists of categorizing performance in each functional area. The categories which we have used to evaluate the performance of your facilities are defined in section II of the enclosed SALP Board Report. As you are aware, the NRC has changed the policy for the conduct of the SALP program based on our experiences and the recently implemented reorganization which emphasizes the regionalization of the NRC staff. This report is the product of the revised policy. Any comments, which you have concerning our evaluation of the performance of your facility should be submitted to this office within twenty days following the date of our meeting in Petersburg, Florida.

Your comments, if any, and the SALP Board Report, will both appear as enclosures to the Region II Administrator's letter which issues the SALP Report as an NRC Report. In addition to the issuance of the report, this letter will, if appropriate, state the NRC position on matters relating to the status of your safety programs.

In accordance with 10 CFR 2.790 (a), a copy of this letter, the enclosure and your response, if any, will be placed in the NRC's Public Document Room unless you notify this office, by telephone, within ten days following the date of our meeting in Petersburg, Florida, and submit written application to withhold information contained therein twenty days following the date of our meeting. Such application must be consistent with the requirements of 10 CFR 2.790 (b)(1).

NOV 16 1982

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

R. C. Lewis, Director
Division of Project and
Resident Programs
Region II SALP Board Chairman
