

May 13, 1994
Board Notification 94-09

MEMORANDUM FOR: Atomic Safety and Licensing Board
and All Parties

FROM: Steven A. Varga, Director
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation

SUBJECT: SUPPLEMENTAL INFORMATION POTENTIALLY RELEVANT AND MATERIAL
TO BOARD PROCEEDING IN THE MATTER OF VOGTLE ELECTRIC
GENERATING PLANT, UNITS 1 AND 2

In conformance with the Commission's policy on notification of the Licensing Board of new, relevant, and material information, this memorandum calls attention to the information discussed below.

The Board has pending before it a contention challenging the application of Georgia Power Company (GPC) to authorize Southern Nuclear Operating Company, Inc. (Southern Nuclear), a subsidiary of The Southern Company, to operate Vogtle Electric Generating Plant, Units 1 and 2. Specifically, the contention challenges whether Southern Nuclear possesses the requisite character, competence and integrity, as well as the necessary candor, truthfulness and willingness to abide by regulatory requirements. On May 5, 1994, the NRC staff received additional allegations regarding actions after the March 20, 1990, Site Area Emergency which may be relevant to this issue.

The allegations are being reviewed to determine if an OI investigation is appropriate. Release of the allegations at this time would potentially compromise the integrity of any such investigation. If requested, the staff is prepared to share the allegations and to discuss this matter further with the Licensing Board at an ex parte, in camera session.

This information is being brought to the attention of the Licensing Board, and all parties, as it may be relevant and material to issues pending before the Licensing Board.
