Director of Nuclear Reactor Regulation  
Attention: Mr. John Stolz, Chief  
Operating Reactors Branch No. 4  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

NRC DOCKETS 50-321, 50-366  
OPERATING LICENSES DPR-57, NPF-5  
EDWIN I. HATCH NUCLEAR PLANT UNITS 1, 2  
NUREG-0737 ITEMS II.F.1.4, II.F.1.5, II.F.1.6  
ADDITIONAL ACCIDENT-MONITORING INSTRUMENTATION

Gentlemen:

By the Nuclear Regulatory Commission's letter of December 17, 1982, Georgia Power Company (GPC) was requested to provide additional information for the NRC staff post-implementation review of NUREG-0737 Items II.F.1.4 "Containment Pressure Monitor", II.F.1.5 "Containment Water Level Monitor", and II.F.1.6 "Containment Hydrogen Monitor". This information was requested to be submitted within 30 days of receipt of your letter.

As discussed with the Hatch Licensing Project Manager, Mr. George Rivenbark, on January 14, 1982, response to this request requires the obtaining of information from equipment vendors. The date that the necessary information can be obtained will not support a response within the requested 30-day period. The II.F.1.4 and II.F.1.5 portions of our response should be complete and available for staff review by February 14, 1983, while the II.F.1.6 portion should be complete by April 19, 1983. GPC proposes to submit all of this information by April 19, 1983.

Please contact this office if you have any questions.

Very truly yours,

L. T. Gucwa  
Chief Nuclear Engineer
