TUELECTRIC

March 28, 1991

William J. Cahill, Jr.
Executive Vice President

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES) - UNIT 1
DOCKET NO: 50-445
AMENDMENT TO THE MID-YEAR 1990 CPSES
SEMI-ANNUAL RADILOGICAL EFFLUENT REPORT

REF: TU Electric letter logged TXX-90299 from William J. Cahill, Jr.
to Robert D. Martin (Region IV) dated August 29, 1990.

Gentlemen:

While compiling the end-of-the-year 1990 semi-annual effluent report for CPSES, several errors were discovered in the data reported by the Offsite Dose Calculation Manual (ODCM) software. User editable parameters which affect the quantity of tritium reported, the total dilution volume for liquid wastes, and the average stream flow for liquid wastes were not updated. As a result some of the data reported in Tables 7.1, 7.3, 7.4, 7.5 and 7.6 of the mid-year 1990 report provided with the referenced letter are in error. The attached tables reflect corrected data and should be substituted for the corresponding table in to the original report.

An evaluation of these errors shows that CPSES remained in compliance with the applicable radiological effluent controls. Measures have been implemented to provide assurance that these errors not recur.

If there are any questions, please contact Mr. Greg Bell at (214)812-4373.

Sincerely,

William J. Cahill, Jr.
William J. Cahill, Jr.
