NRC Docket No. 50-341
NRC License No. NPF-43

Subjects: Submittal of Revision 4 to the Fermi 2
Updated Final Safety Analysis Report
and the Annual 10CFR50.59 Safety
Evaluation Summary Report

Pursuant to 10CFR50.71(e) and 10CFR50.59(b), Detroit Edison hereby submits Revision 4 to the Updated Final Safety Analysis Report (UFSAR) for Fermi 2 and the annual Safety Evaluation Summary Report.

The signed original and ten additional copies of the UFSAR, Revision 4, are enclosed; one copy will be submitted to Region III and one copy to the NRC Site Inspector. The UFSAR contains changes made since submittal of Revision 3 in March 1990 and as a minimum describes the plant configuration through September 20, 1990, six months prior to this submittal. Changes associated with Revision 4 are annotated by revision bars in the appropriate margin marked with a "4". All revised pages are marked Rev. 4 3/91.

Please note that, in accordance with Generic Letter 88-12, the fire protection technical specifications were removed from the Technical Specifications by Amendment No. 62. Detroit Edison is now following the fire protection program requirements contained in UFSAR Appendix 9A.6, "Fire Protection Conditions for Operation".
