

March 22, 1991

DESIGNATED ORIGINAL

Docket Nos. 50-266
and 50-301

Mr. C. W. Fay, Vice President
Nuclear Power Department
Wisconsin Electric Power Company
231 W. Michigan Street, Room 308
Milwaukee, Wisconsin 53201

Dear Mr. Fay:

SUBJECT: SCHEDULE FOR IMPLEMENTATION OF SPDS (MPA F-072, TAC NOS. 73693
AND 73694)

By letter dated January 8, 1991, we advised you of our acceptance of your certification that the safety parameter display system (SPDS) at Point Beach Nuclear Plant, Units 1 and 2, will fully meet the guidance of NUREG-0737, Supplement 1, by March 1991. By letter dated March 5, 1991 (NRC-91-025), you provided further information on SPDS implementation and clarified the schedule for remaining actions.

We are in agreement with your clarification and have no comment.

It is my understanding that your written notification of full implementation of the SPDS will await your completion of any actions found necessary from your review of parameter labels and abbreviations (Action item 6 in your March 5, 1991 letter). I also understand that you estimate this will be done by December 1991.

Please keep us advised of any further developments.

Sincerely,

original signed by

Robert B. Samworth, Sr. Project Manager
Project Directorate III-3
Division of Reactor Projects III/IV/V
Office of Reactor Regulation

DESIGNATED ORIGINAL

March 26, 1991

Docket No. 50-277

Mr. Johann Lindner, Vice President
U.S. Fuel Operations
ASEA Brown Boveri (ABB) Atom Inc.
200 Great Pond Drive
Windsor, Connecticut 06095

Dear Mr. Lindner:

SUBJECT: REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC DISCLOSURE, PEACH
BOTTOM ATOMIC POWER STATION, UNIT 2 (TAC NO. 79325)

By your affidavits dated October 24 and November 19, 1990, transmitted in a November 21, 1990 letter from G. A. Hunger, Jr., of the Philadelphia Electric Company to the NRC, you submitted "Supplemental Lead Fuel Assembly Licensing Report - SVEA-96 LFAs to Peach Bottom 2-Summary," ABB Atom Report BR 90-004, dated October 1990, and "ABB SVEA-96 Design Features and Specifications," ABB Atom Letter ABB 90-460, dated November 19, 1990, and requested that the submitted information be withheld from public disclosure pursuant to 10 CFR 2.790.

You indicated that the submitted information should be considered exempt from mandatory public disclosure based on the determination that the submitted documentation has been found to contain information which is proprietary and which is customarily held in confidence by ABB Atom. The information was stated to have been held in confidence by ABB Atom, and the information is not available in public sources. You further stated that public disclosure of the information is likely to cause substantial harm to the competitive position of ABB Atom because it would enhance the ability of competitors to determine the performance characteristics of ABB Atom fuel assemblies without commensurate expenses.

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.790 and, on the basis of ABB Atom's statements, have determined that the submitted information sought to be withheld contains trade secrets or proprietary commercial information. Therefore, "Supplemental Lead Fuel Assembly Licensing Report - SVEA-96 LFAs to Peach Bottom 2-Summary," ABB Atom Report BR 90-004, dated October 1990, and "ABB SVEA-96 Design Features and Specifications," ABB Atom Letter ABB 90-460, dated November 19, 1990, marked as proprietary, will be withheld from public disclosure pursuant to 10 CFR 2.790(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

Sincerely,

/S/
