Baltimore, MD 21203

Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP)

The NRC Region I SALP Board conducted a review on November 29, 1982 and evaluated the performance of activities associated with the Calvert Cliffs Nuclear Power Plant. The results of the assessment are documented in the enclosed Report. A meeting has been scheduled on December 14, 1982 at the site to discuss this SALP. That meeting is intended to provide a forum for candid discussions relating to this performance.

At the meeting, you should be prepared to discuss your plans to improve your control over equipment or procedural changes that can impact upon your ability to maintain control over the plant design. Also, any comments you may have regarding our report may be discussed at the meeting. Additionally, you may provide written comments within 20 days after the meeting.

After our meeting and receipt of your response, the enclosed report, your response, and a summary of our findings and planned actions will be placed in the NRC Public Document Room.

Sincerely,

Original Signed by

Richard Starostecki

Richard W. Starostecki, SALP Board
Chairman
Director, Division of Project and
Resident Programs
