Docket No. 50-293

OCT 2 6 1981

MEMORANDUM FOR: L. K. Cohen, Health Physicist, Reactor Radiological Safety Section, RSB:IE:HQ

FROM: J. J. Kottan, Radiation Laboratory Specialist, DEPOS, IE:RI

SUBJECT: ADDITIONAL INFORMATION FOR Fe-55 AND P-32 IN THE MARINE PATHWAY

In the memorandum to you dated October 22, 1981 regarding the same subject, it was stated that the mussel sample containing the Fe-55 was taken from the plant outfall on January 10, 1980. This is incorrect. The mussel sample was taken from sampling site 15 (Manomet Point) on January 11, 1980. Therefore, the Fe-55 result is not related to the LER submitted for the mussel sample taken on January 10, 1980 at the plant outfall. Attachment A to the October 22 memorandum should also be corrected - site 11 should be changed to site 15.
