Docket #030-22135

USNR - Region I
475 Allendale Road
King of Prussia, PA 19406

Subject: Routine inspection of our facility on 1/29/91
by Anthony S. Kirkwood

Gentlemen:

This is written to inform you of the corrective actions which we have taken as a result of the inspection of our facility by Mr. Anthony S. Kirkwood on 1/29/91.

1. A registration letter has been sent to the Transportation Certification Branch (on 2/21/91).

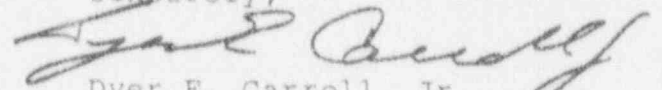

2. A COC has been requested from Technical Operations for the 660 camera (on 2/21/91).

3. We have modified our shipping notice to provide for logging the surveys of the container at the beginning and end of each trip. It is our current understanding that the source container is to be surveyed at its surface and at 3 feet and both readings recorded before putting the container in the car for the trip out and before putting the container in the car for the trip back.

4. With respect to the Q/A program for our 660 camera and controls: we are in the process of license renewal application (our expiration date is 5/31/91). We therefore respectfully request that we be permitted to use our new license application as our request for approval of the Q/A program. The new application will be in for review before the end of April.

If there should be any questions please do not hesitate to call us.

Sincerely,

Dyer E. Carroll, Jr.
