

Commonwealth Edison  
1400 Opus Place  
Downers Grove, Illinois 60515

April 2, 1991

Dr. Thomas E. Murley, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Attn: Document Control Desk

Subject: Zion Station Units 1 and 2  
License Nos. DPR-39 and DPR-48  
Withdrawal of Proposed Technical Specification  
NRC Docket Nos. 50-295 and 50-304

Reference: (a) September 28, 1988, letter from G.E. Trzyna  
to U.S. NRC

Dear Dr. Murley:

Commonwealth Edison originally submitted a proposed Technical Specification Amendment via the Reference regarding the testing requirements for the boric acid system piping heat trace. At this time Commonwealth Edison requests that the proposed Amendment referenced above be withdrawn.

In the near future Commonwealth Edison plans to request an Amendment involving a change in the boric acid system required concentration. Appropriate revisions to the testing requirements for boric acid system heat trace will be included with this amendment request.

Please direct any questions on this matter to this office.

Very truly yours,

S.F. Stimac  
Nuclear Licensing Administrator
