Attention: Mr. J. G. Keppler
Regional Administrator

RE: WM. H. ZIMMER NUCLEAR POWER STATION UNIT 1
10CFR50.55(e) ITEM M-72, LACK OF QA PROGRAM
FOR FP SYSTEM INSTALLATION - DOCKET NO. 50-358,
CONSTRUCTION PERMIT NO. CPPR-88, W.O. 57300,
FILE NO. NRC-8

Gentlemen:

This letter constitutes an interim report concerning the subject condition, initially reported to the Commission as a potentially reportable deficiency under 10CFR50.55(e).

A document and commitment review, more extensive than originally anticipated, is in progress to identify the requirements and related commitments of Branch Technical Position (BTP) APCSB 9.5-1, Appendix A, and the manner in which these were implemented and documented. It is not possible to draw any definite conclusions from the review performed to date.

We anticipate that the results of this review will indicate that the design and procurement controls implemented met the requirements of BTP APCSB 9.5-1, Appendix A, and that documentation required for the fire protection systems concerning the installation and testing can be assembled. This review is scheduled to be completed by April 30, 1983 at which time a report will be submitted.

We trust the above will be found acceptable as an interim report under 10CFR50.55(e).

Very truly yours,

THE CINCINNATI GAS & ELECTRIC COMPANY

By *E. A. Borgmann*
