U.S. Nuclear Regulatory Commission
Washington D.C. 20555

Glenn O. Bright
Atomic Safety & Licensing Board
U.S. Nuclear Regulatory Commission
Washington D.C. 20555

Gentlemen:

Applicant's "Motion for Leave to Supplement Memorandum", dated February 17, 1983, contains a small but significant misrepresentation of fact. We would like to clarify the circumstances which led to the statements made by Chairman John Wolf in the special prehearing conference in Puget Sound Power & Light Co. (Skagit/Hanford Nuclear Project, Units 1 and 2) held on May 5, 1982 which Applicant seeks to make a part of the record in this proceeding.

Chairman Wolf's comments regarding discovery requests of Mr. Dana and whether or not such requests would constitute harassment were based on his belief that Mr. Dana was a potential witness, not a member, of the Coalition. This was clear to all parties at the proceeding and is evidenced at Page 37, line 12 of the Transcript attached to Applicant's motion. Contrary to Applicant's claim that "...the transcript in Skagit/Hanford reveals that the Licensing Board there rejected petitioner's claim of harassment and indicated that petitioner's member had an obligation to respond to a request for discovery propounded by the applicants regarding standing" the Board did not so find.

Sincerely,

Nina Bell
Staff Intervenor
