Gentlemen:

We have received a copy of your application dated October 25, 1982 (Proposed Change 82-12), which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. This application relates to organizational changes at the Pilgrim Nuclear Power Station. In this application, your Company stated that the organizational changes requested in your June 8, 1981 application were withdrawn in their entirety and were being partly resubmitted in the October 25 request. You determined that a Class II fee (\$1,200) is appropriate for the October 25 application, and requested that the fees submitted for your June 8 withdrawn request be applied to the October application.

It is NRC policy to refund fees, or give credit for fees, on withdrawn applications when no review has commenced at the time the application is withdrawn. Also, we do not require additional fees for applications that are resubmitted as long as the resubmitted one does not significantly change the earlier application or does not cause any review already completed to be obsolete. The ONRR staff have informed us that although both applications are in connection with organizational changes, considerable review had already been completed on the June application at the time it was withdrawn and the two applications are very different. On this basis, your October 25 application is subject to separate fees. The changes requested in it are considered to be more than pro forma or administrative in nature because they will involve review of new positions and additional managerial responsibilities that are considered to have safety significance. As such, the October request will require a Class III fee of \$4,000. Therefore, it is requested that your Company remit a sum of \$4,000 to our office. If the ONRR staff's final review of the October application reveals that the Class III fee is not correct, you will be notified and any necessary adjustments will be made.

Sincerely,

Original Signed by:
