Mr. O. R. Lee, Vice President  
Electric Production  
Public Service Company of Colorado  
P.O. Box 840  
Denver, Colorado 80201

Dear Mr. Lee:

SUBJECT: FORT ST. VRAIN NUCLEAR GENERATING STATION, AMENDMENT NO. 33  
TO FACILITY OPERATING LICENSE DPR-34

The Commission has issued the enclosed Amendment No.33 to Facility Operating License DPR-34 for the Fort St. Vrain Nuclear Generating Station in response to your application for amendment dated October 15, 1982 (P-82432), as superseded by letter dated February 22, 1983 (P-83072).

The amendment revises the Technical Specifications to update various Surveillance Requirements related to the In-Service Inspection and Testing Program contained in subsections 5.1, 5.2, and 5.3.

The additional subsections of Section 5.0 (5.4 through 5.10) included in your application were not considered to be within the scope of this review and no action is planned for their implementation. Discussions with members of your staff indicated that these changes (reformatting and numbering) would be included in future applications as changes within these subsections are proposed.

A copy of the Safety Evaluation supporting this amendment and the related Federal Register Notice are also attached.

Sincerely,

*Philip C. Wagner*

Philip C. Wagner, Project Manager  
Reactor Project Branch 1
