Mr. Carlton Kammerer
Director of Congressional Liaison
United States Nuclear
Regulatory Commission
Washington, D.C. 20055

Dear Mr. Kammerer:

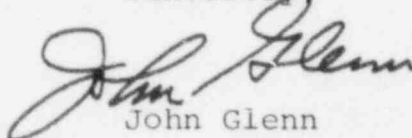

Enclosed please find a copy of a letter from one of my constituents, Scott Spehar, concerning the conditions, operations, safety, and expense of the Davis-Besse nuclear plant in Port Clinton, Ohio.

I would appreciate your most expeditious attention to this matter. Please respond directly to Mr. Spehar. However, for my office records, please send a copy to Brian Dettelbach of my staff.

Thank you for your help.

Best regards.

Sincerely,

John Glenn

Dear Senator Glenn;

I would like some information on the nuclear power plant Davis-Besse. I would like to know just exactly how safe it is. I would like to know why it has been shut down so much(it's probably been shut down more than it has been in use.) Do you think that someday soon it will be in good operational use? I would like to know what measures have been taken to bring it back in operational use. I don't want to sound angry or anything, but I would like to know if my tax money is going to any use on the project.

I would also like to know if they are planning on building any more power plants in this vicinity (Precinct 5) If they do will they be of much benefit? I know that they are very expensive to build and operate, especially when they have to be repaired most of the time, but if they do build any more, will they actually help us.

I realize you are busy, so thank you for the time you spent to read this letter.

A concerned citizen,

Scott Spehar
