February 10, 1983  
LIC-83-038

Mr. Harold R. Denton, Director  
U. S. Nuclear Regulatory Commission  
Office of Nuclear Reactor Regulation  
Washington, D.C. 20555

Reference: Docket No. 50-285

Dear Mr. Denton:

Fort Calhoun Station  
Radiological Emergency Response Plan and  
Emergency Plan Implementing Procedures

Effective December 28, 1982, 10 CFR 50.54(q) and Appendix E to this part were amended to reduce the number of copies of changes to nuclear power plant emergency plans and procedures that must be submitted to the Commission. Specifically, this revision reduces the number of copies to be submitted from thirteen (13) to three (3) and requires that two (2) of these copies be submitted to the Document Control Desk in Washington, D.C. and one (1) copy to the appropriate NRC Regional Office. Since your office and the Office of Inspection and Enforcement in Washington, D.C. presently hold a combined total of ten (10) copies (controlled copy numbers 157 through 166) of the subject emergency plan and procedures, the District requests that copy numbers 157 through 164 of both the plan and procedures be returned to the District. It is important that these manuals be returned so as to prevent use of a copy for which future revisions will not be provided.

Please note that controlled copy numbers 165 and 166 are presently held by Mr. D. Rohrer and Mr. E. Tourigny, respectively. For copy numbers 165 and 166 of the emergency plan and implementing procedures, the District will submit changes to these copies directly to the Document Control Desk, in accordance with the new rule.

Sincerely,

*W.C. Jones*  
W. C. Jones
