SUBJECT: Arkansas Nuclear One - Unit 2
Docket No. 50-368
License No. NPF-6
ANO-2 Startup Report

Gentlemen:

ANO-2 has recently returned to operation following a refueling outage. The refueling was performed under the provisions of 10CFR50.59, and since there were no modifications which significantly altered the nuclear, thermal, or hydraulic performance of the plant, submittal of a Startup Report is not required by Technical Specification 6.9.1.1. We have, however, assembled a report summarizing precritical, low power, and power escalation testing, and are forwarding a copy for your information.

Very truly yours,

John R. Marshall
Manager, Licensing
