

## DECLARATION OF MARTIN R. KAUFMAN

I, Martin R. Kaufman, am the Declarant herein, and I hereby make the following statements under the penalty of perjury:

- 1) I am an adult citizen of the United States, am not under disability, and make the following statements voluntarily.
- 2) I urge the NRC to deny DTE's license amendment request for the NRC's approval to substitute the insertion of SNAP-IN neutron conductors, into their spent fuel pools, and thereby obtain relief from their current license extension commitment to replace the degraded Boraflex storage racks with Boral racks.
- 3) I reside at 1515 East Hurd Road, Monroe, MI 48162. This address is within 4.75 air miles of the Fermi reactor. I am concerned that Fermi's proposed use of SNAP-IN neutron conductors could jeopardize my safety and the safety of other residents in the vicinity.
- 4) In order to ensure that the continued operation of the Fermi 2 nuclear reactor does not infringe upon my vested interest in a safe and healthy environment, I authorize Citizens Resistance at Fermi 2 (CRAFT) to act on my behalf to intervene in the permitting proceedings in order to verify that they're conducted fairly; with full consideration of the issues that could affect the public health, and safety.
- 5) I request that CRAFT, a grassroots organization with approximately 1,500 members residing within a 50-mile radius of the Fermi reactor, be accorded full standing, so that it may adequately represent its members, including myself, in this matter
