

DOCKET NUMBER
PROD. & UTIL. FAC. 50-271

80 Lornis St.
Burlington, VT. 054
Feb. 16, 1981

Mr. John Ahearne
Nuclear Regulatory Commission
Wash., D.C. 20555

Dear Chairman Ahearne:

I am yet one more individual pleading my worries about a very real and alarming issue facing the State of Vermont. Yes, I am referring to the conditions of the state's lone nuclear ~~reactor~~ reactor, Vermont Yankee. We both know the serious safety violations and spiraling repair costs associated with the plant; there is no need for me to review these with you.

I am asking you from the depths of my heart to work for a full and public investigation regarding the ~~of~~ safety of Vermont Yankee.

Please give the matter your serious consideration.

With Love,
Paul W. Marberry
