Ironton, OH 45638

License No. 34-16241-01  
Docket No. 030-10838

Dear Mr. Vanderhoof:

This refers to the routine safety inspection conducted by Mr. D. R. Gibbons of this office on June 14-15, 1994, of activities authorized by NRC Byproduct Material License No. 34-16241-01, and to the discussion of our findings with Ms. Sherri Davidson, Ms. Katherine Fuller and Dr. B. R. Yalamanchili at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letters dated February 2 and 25, 1994, regarding violations found during our October 1, 1992 inspection. Except for violation A.2., we have no further questions regarding these matters.

Regarding violation A.2., the inspector determined that your corrective actions to adjust the permanent radiation records of two technologists had not been completed as of the day of the inspection, June 15, 1994. This was discussed with your personnel at the close of the inspection, and documentation was introduced confirming that a request to adjust the aforementioned records was submitted to your dosimetry supplier. Personnel committed to submitting another request to the supplier to resolve this matter. In your response, please inform the Commission if the results obtained from the above request satisfactorily resolved this matter.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.
