

Docket No. 50-254
50-265

MAY 18 1983

Mr. Dennis L. Farrar
Director of Nuclear Licensing
Commonwealth Edison Company
P. O. Box 767
Chicago, Illinois

Dear Mr. Farrar:

SUBJECT: NUREG-0737 ITEM III.A.2.1 EMERGENCY PLAN UPGRADE TO MEET RULE

Re: Quad Cities Nuclear Power Station, Units 1 and 2

Enclosure 1 to NUREG-0737 identified Item III.A.2.1 as "Emergency Preparedness, Upgrade Emergency Plans to Appendix E, 10 CFR 50." It also stated that licensee emergency plan and procedure submittals were due January 2, 1981 and March 1, 1981 respectively, and that licensee onsite emergency preparedness programs were to be implemented by April 1, 1981. Plans and procedures have been received from you and your emergency preparedness programs have been implemented.

Following this, during the period March 1981 to April 1982, a comprehensive two-week onsite emergency appraisal was conducted at your site wherein deficiencies and improvement items were identified and a subsequent inspection report was issued. You have responded and corrective actions were taken. The NRC Regional Offices are now verifying these actions through the normal inspection process.

Full scale exercises involving licensee, State and local government personnel, have been conducted at your site between April 1981 and April 1982. Again, you were required to take action as necessary to correct identified deficiencies and the NRC Regional Offices are verifying the corrective actions taken through followup inspections, drills and exercises.

The Federal Emergency Management Agency evaluation of the status of offsite preparedness is a continuing process involving a review of State and local plans and the observation of full scale exercises, and culminates in a finding under its proposed rule 44 CFR 350. This process is supplementary to its findings for operating reactors as well as for NTOLs, as described in the NRC/FEMA Memorandum of Understanding, dated November 4, 1980. For your

plants the NRC has found that onsite and offsite emergency preparedness is adequate, that your emergency plans have been upgraded in accordance with NUREG-0737 Item III.A.2.1 and that there is reasonable assurance that prompt protective measures can and will be taken to protect the public. Therefore, we consider NUREG-0737 Item III.A.2.1 as complete for Quad Cities Nuclear Power Station, Units 1 and 2.

Sincerely,
