Edwin I. Hatch Nuclear Plant
Request to Revis: Technical Specifications:
Improved Standard Technical Specifications Submittal Revision

Gentlemen:

By letter dated February 25, 1994, GPC proposed to convert the current Edwin I. Hatch Nuclear Plant Technical Specifications to the Improved Technical Specifications consistent with NUREG 1433. Attached is a partial revision to the February 25 amendment request. The attachment includes page change insertion instructions. This revision is the result of meetings and discussions with the NRC staff, resolution of industry generic issues, and additional analysis to support a change in the drywell pressure limiting condition for operation. Any revisions to, or additional no significant hazards evaluations, are also provided. The Environmental Assessment provided in the February 25, 1994 submittal remains valid.

In accordance with the requirements of 10 CFR 50.91, a copy of this letter and all applicable attachments will be sent to the designated State official of the Environmental Protection Division of the Georgia Department of Natural Resources.

Mr. J. T. Beckham, Jr. states he is Vice President of Georgia Power Company and is authorized to execute this oath on behalf of Georgia Power Company, and to the best of his knowledge and belief, the facts set forth in this letter are true.
