Mr. William J. Cahill, Jr.  
 Group Vice President, Nuclear  
 TU Electric  
 400 North Olive Street, L.B. 81  
 Dallas, Texas 75201

Dear Mr. Cahill:

SUBJECT: SAFETY EVALUATION OF REQUESTS FOR RELIEF TO THE FIRST TEN-YEAR INTERVAL INSERVICE INSPECTION PROGRAM PLAN FOR COMANCHE PEAK STEAM ELECTRIC STATION, UNIT 1 (TAC NO. M87765)

By letter dated September 23, 1993, you submitted additional requests for relief to the first ten-year interval inservice inspection (ISI) program plan for the Comanche Peak Steam Electric Station (CPSES), Unit 1. Specifically, requests for relief Nos. A-1 and A-2 were submitted, respectively, regarding corrective measures for leaking bolted connections and VT-2 visual examination of bolted connections in borated insulated systems.

The staff has completed its review of the proposed relief requests. The basis for the staff's conclusions are contained in the enclosed safety evaluation. For the proposed relief requests, the staff has authorized the alternative testing proposed pursuant to 10 CFR 50.55a(a)(3)(i), in that it provides an acceptable level of quality and safety.

In addition, in the staff's October 1, 1992, safety evaluation of the first 10-year ISI plan and associated relief requests for CPSES Unit 1, the first 10-year interval was incorrectly stated as the period from February 8, 1990, to February 8, 2000. The correct interval for the first 10-year ISI interval for CPSES Unit 1, is August 13, 1990 (date of initial commercial operation), to August 12, 2000.

Sincerely,

ORIGINAL SIGNED BY:  
 William D. Beckner, Director
