

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION IV  
611 RYAN PLAZA DRIVE, SUITE 1000  
ARLINGTON, TEXAS 76011

May 20, 1983

MEMORANDUM FOR: R. A. Clark, Chief  
ORB-3, NRR

FROM: G. L. Madsen, Chief  
RPB-1, RIV

SUBJECT: REQUEST FOR PUBLICATION IN MONTHLY FR NOTICE - NOTICE  
OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY  
OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS  
CONSIDERATION DETERMINATION AND OPPORTUNITY FOR A HEARING

Licensee: Public Service Co. of Colorado

Docket No: 50-267

Facility: Fort St. Vrain

Location: Platteville, CO

Date of amendment request: April 7, 1983

Description of amendment request: The amendment would incorporate provisions on minimum shift crew size, guidelines for working hours, qualifications of technical advisors and revise the membership of the onsite safety review committee. These proposed changes were made in response to NRC requests and revise those Administrative Controls provisions to achieve consistency with present NRC staff positions on these subjects.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). The examples of actions involving no significant hazards include actions which are purely administrative changes to the Technical Specifications, are changes to make the licensee conform to changes in the regulations, or additional limitations or restrictions. The changes proposed in the application are encompassed by these examples as follows: 1) format and editorial changes are purely administrative changes, 2) incorporation of provisions on a minimum shift crew size are additional limitations and are in conformance with changes to 10 CFR 50.54, 3) incorporation of guidelines on working hours and qualifications of technical advisors are additional limitations providing conformance to staff positions, and 4) revisions to the onsite review committee membership incorporate more restrictive qualifications necessary for committee membership. Since the application for amendment to the Administrative Controls Technical Specifications involves changes to incorporate present NRC regulations and staff positions, the staff proposes to determine that the application does not involve a significant hazards consideration.
