

MAY 31 1983

DOCKET NO: 70-2838

APPLICANT: Cincinnati Gas & Electric Company

FACILITY: Wm H. Zimmer Nuclear Power Station, Unit 1

SUBJECT: SAFETY EVALUATION REPORT, AMENDMENT APPLICATION
DATED MAY 12, 1983

I. Background

Cincinnati Gas & Electric Company, Columbus and Southern Ohio Electric Company, and The Dayton Power and Light Company are licensed under NRC Materials License No. SNM-1823 for the receipt and storage of fuel and accessories for eventual use in the Wm. H. Zimmer Nuclear Power Station, Unit 1. The license is scheduled to expire July 31, 1983. The application requests that the license expiration date be extended to July 31, 1985.

II. Discussion

The need for an extension of the license expiration date is due to construction and licensing delays. Extending the expiration date does not affect the radiological safety, nuclear safety, or other parameters on which the issuance of the license was based.

III. Recommendation

On the basis of the above, I recommend that the license extension, as requested by the licensee, be approved.
