

5/14/93 Jrc  
UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

April 30, 1993

COMSECY-93-24

MEMORANDUM FOR: The Chairman  
Commissioner Rogers  
Commissioner Curtiss  
Commissioner Remick  
Commissioner de Planque

FROM: James M. Taylor  
Executive Director  
for Operations

SUBJECT: STAFF GUIDANCE ON THE DISPOSITION OF INDUSTRY  
DOCUMENTS RECEIVED THROUGH NONROUTINE  
CHANNELS

The Commission has expressed interest in the handling and disposition of documents received by the staff from industry representatives or other outside organizations and individuals. The attached Management Directive 3.4, "Public Release of Information," incorporates staff guidance for the uniform handling of such information in Part II of Handbook 3.4.

A staff member receiving such information is now to inform his or her immediate supervisor of its receipt and inform the sender that the information will be placed in the Public Document Room unless the submittal contains proprietary or other sensitive information. Any agency response shall also be placed in the Public Document Room after coordination with the staff responder's immediate supervisor.

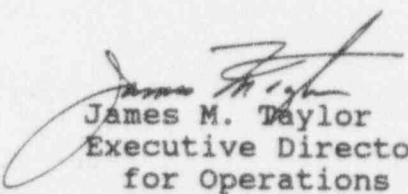

Management Directive 3.4 also consolidates Bulletin 3203-15, "NRC Policy for Routinely Making the NRC Records Publicly Available" (January 28, 1985) and Bulletin 3203-25, "Policy on Release of Draft and Predecisional Documents and Information" (February 9, 1988), neither of which was issued as a manual chapter in the old management directive system.

Commissioners

- 2 -

It is my intent to issue Management Directive 3.4, "Public Release of Information," within 10 working days from the date of this memorandum unless I am instructed otherwise by the Commission.

SECY, Please track.

James M. Taylor  
Executive Director  
for Operations

## Release of Information to the Public Directive 3.4

### Policy (3.4-01)

The U.S. Nuclear Regulatory Commission (NRC) releases information to the public relating to its health and safety mission, consistent with its legal obligations to protect information and its deliberative and investigative processes. The NRC protects draft and predecisional information from inadvertent release, except when its release is required to resolve a significant safety or safeguards issue or an emergency.

### Objectives (3.4-02)

- To provide the NRC staff with general policy guidance on the public release of agency information, including draft and predecisional documents and information. (021)
- To ensure that documents will not be provided to one licensee or a member of the public unless they can be made available, generally through the NRC Public Document Room, to all persons, except under the conditions described in Part II, Sections (B) and (C), of the handbook to this directive. (022)
- To ensure that staff documents are developed and issued without improper influence, real or perceived, by the public or by applicants, licensees, permittees, or their subcontractors or agents (hereafter referred to in this directive and its handbook as "licensees"). (023)
- To ensure that sufficient flexibility is provided to office directors and regional administrators so that they and their staffs will not hesitate to disseminate appropriate safety and safeguards information to licensees before distribution of final documents. (024)

**Volume 3, Part 1 – Publications, Mail, and Information Disclosure**  
**Release of Information to the Public**  
**Directive 3.4**

---

**Objectives**

(3.4-02) (continued)

- To provide guidance to the NRC staff about the types of documents that should be placed into the Nuclear Documents System (NUDOCS) and to specify the file classifications of these documents so that designated document types and other documents, as appropriate, may be forwarded to the Public Document Room (PDR) and to the Local Public Document Rooms (LPDRs). (025)

**Organizational Responsibilities and Delegations of Authority**

(3.4-03)

**The Executive Director for Operations (EDO)**

(031)

- Provides policy guidance on the public release of information. (a)
- Approves the release of any draft inspection report or enforcement document to individuals, licensees, or their agents, or to any organization or person outside the NRC. (b)

**The Director, Office of Administration (ADM)**

(032)

- Develops NRC policy relating to public release of information. (a)
- Ensures that public records are available at agency LPDRs. (b)

**The Director, Office of Information Resources Management (IRM)**

(033)

Develops policies and procedures for placing documents into NUDOCs and provides oversight of its operations.

**Volume 3, Part 1 – Publications, Mail, and Information Disclosure**  
**Release of Information to the Public**  
**Directive 3.4**

---

**Office Directors and  
Regional Administrators**  
(034)

- Implement the policy and procedures in this directive and its handbook for the public release of information. (a)
- Provide additional guidance or procedures, specific to the requirements of their offices or regions as necessary. (b)
- Protect draft and predecisional information from inadvertent release. (c)
- Grant permission for the release of draft or predecisional information, as appropriate, except information generated during the development of an inspection or enforcement document, and maintain a written record of the release. (d)
- Ensure the prompt and appropriate dissemination of draft safety and safeguards information to licensees when required to resolve a significant safety or safeguards issue, or an emergency. These responsibilities may be redelegated to the deputy office director or the deputy regional administrator. (e)
- Respond to Freedom of Information Act (FOIA) requests that seek material containing draft and predecisional information by determining what information should be disclosed and what information should be withheld under an FOIA exemption. (f)
- Ensure that employees who assign Regulatory Information Distribution System (RIDS) codes are adequately trained in the use of these codes, as specified in Management Directive 3.50, "Document Management" (formerly MC 0232). (g)
- Take corrective action in the event any information for which they are responsible is released contrary to NRC policy and inform the EDO in writing of this action. (h)

**Inspectors**  
(035)

- Where approved by regional management, may, in preparing for exit interviews or enforcement meetings, provide a listing of significant issues developed in the course of an inspection to the

---

**Inspectors**  
(035) (continued)

licensee in order to facilitate the communication of inspection findings that require corrective actions. (a)

**Note:** Inspection notes, draft reports, draft evaluations, draft notices of violations or noncompliance, and other material containing preliminary inspection conclusions, findings, and recommendations are not to be provided to the licensee, except as required by safety or security concerns.

- Attach a copy of the information provided to the licensee to the inspection report for the record. (b)

**NRC Employees**  
(036)

All NRC employees and consultants must—

- Protect all draft and predecisional documents, including draft inspection and enforcement documents, from inadvertent release. (a)
- Ensure that RIDS codes are properly applied in accordance with the guidance in this directive and handbook and that documents intended for release to the PDR are properly marked and submitted to the Document Control Desk for entry into NUDOCs and forwarding to the PDR. (b)
- Obtain permission from the appropriate office director or regional administrator when questions arise concerning releasability of information before the information is released. (c)
- Promptly notify their supervisor, in writing, of the content and the circumstances surrounding the disclosure of draft or predecisional information not included under Part II (D) of the handbook to this directive. The supervisor shall promptly inform the appropriate office director or regional administrator of the disclosure. (d)
- Contact the Office of the General Counsel for guidance before authorizing submittal of copyrighted material to the PDR. (e)

**Release of Information to the Public**  
**Directive 3.4**

---

**Office of the Secretary of the  
Commission (SECY)**  
(037)

Develops policies and procedures for providing access by members of the public to NRC's publicly available records in the NRC headquarters PDR.

**Applicability**  
(3.4-04)

- This directive and its handbook apply to and must be followed by all NRC employees, including contractors and consultants. (041)
- This directive does not govern public disclosure of information required by or requested under the Freedom of Information, Privacy, Government in the Sunshine, and Federal Advisory Committee Acts and NRC management directives that govern the release of other types of documents and information. (042)

**Handbook**  
(3.4-05)

Handbook 3.4 elaborates on policy in the directive governing the public availability of information in possession of the U.S. Nuclear Regulatory Commission (NRC).

## Introduction

This handbook elaborates on policy in the directive governing the public availability of information in possession of the U.S. Nuclear Regulatory Commission (NRC).

**Part I** sets forth policies and procedures for the release of *draft* and *predecisional information* in the agency's possession.

**Part II** indicates the proper disposition of nonroutine information received from outside organizations and individuals.

**Part III** indicates the categories of information in the agency's possession that are *prohibited* from public disclosure.

**Part IV** consists of a comprehensive table of documents routinely released to the public in the Public Document Room (PDR).

## **Part I**

### **Release of Draft and Predecisional Documents and Information**

#### **Information Requiring Approval Before Release (A)**

In the normal course of conducting regulatory activities, communications with licensees, vendors, industry representatives, and other Government agencies are at times necessary regarding initial NRC staff positions, license conditions, confirmation of action letters, inspection findings, preparation of bulletins and information notices, events at other facilities, and so forth. These communications can occur in advance of the issuance of final NRC documents regarding these activities for the purpose of—

- Gaining factual information
- Assessing the cost, feasibility and benefit of, or alternative to, proposed actions
- Alerting licensees to initial staff positions or safety findings in order that corrective actions can be initiated promptly

However, these draft documents, or information contained in these documents, must not be discussed with, given to, or shown to any licensee or the public by the NRC without prior approval.

#### **Emergency Release of Information (1)**

In the event there is an emergency, or if a significant safety or safeguards issue appears to require immediate action, NRC personnel, at their discretion, may discuss with, show to, or provide the licensee involved any pertinent material they believe circumstances warrant. (a)

## Information Requiring Approval Before Release (A) (continued)

### Emergency Release of Information (1) (continued)

The NRC employee approving release of any written communication to licensees or the public shall have it placed in the Public Document Room (PDR) by sending it to the Nuclear Documents System (NUDOCS) with a clear indication that it is to be forwarded to the PDR. The employee shall also maintain a written record of the release, such as the memorandum transmitting the material to NUDOCs. These communications must not be sent to the PDR if they contain information described as exempt from public disclosure in Part III of this handbook. (b)

Under no circumstances should any information contained in draft inspection reports be released to licensees, their agents, or to any source external to the NRC without the express permission of the Executive Director for Operations (EDO). In the event any draft inspection report is inadvertently or otherwise released contrary to this policy, the EDO should promptly be advised in writing. The EDO will take or recommend action as appropriate. (c)

### Inadvertent Release of Information (2)

In the event any other document is inadvertently or otherwise released by the NRC, its contractors, or other Government agencies contrary to this policy, the EDO should be advised promptly of the occurrence in writing. (a)

In the case of an inadvertent release by NRC, the corrective action to be taken by the responsible office to avoid recurrence of such a release should also be communicated to the EDO. Normally, under these circumstances, the released document should be placed in the PDR through the Office of Information Resources Management (IRM) Document Control Desk/NUDOCS operation. (b)

### Final Release of Information (3)

Final documents will be distributed to ensure that the public, licensees, NRC contractors, and other Government agencies have access to information they need to fulfill their responsibilities. Final documents provided to licensees will be placed in the PDR through the IRM Document Control Desk/NUDOCS operation. If the document is

## **Information Requiring Approval**

### **Before Release (A) (continued)**

#### **Final Release of Information (3) (continued)**

subject to a Freedom of Information Act (FOIA) request, a copy must be forwarded to the Division of Freedom of Information and Publications Services, Office of Administration.

#### **Destruction of Pre-Release Information (4)**

In the interest of sound records management policy, all draft documents, background material, notes, and extra copies of office-file documents should be destroyed after the final version has been issued, except under the following three conditions: (a)

- An FOIA request for these documents has been received and is pending. (i)
- The documents are of central relevance to the regulatory history of a proposed or final rulemaking submitted to the Federal Register for publication by the offices reporting to the EDO. (ii)
- The originator's management has instructed that the documents be retained for future agency use. (iii)

Individuals may retain personal file copies of documents that would be useful in the review of the employee's work by superiors for some time after the work has been completed and issued to the public. (b)

#### **Release of Commission Information (5)**

Documents created by, communicated to, or received from the Commissioners and their staffs must receive prior approval from the Commissioners before their release.

## **Information Not Requiring Approval**

### **Before Release (B)**

The policies contained in this directive and handbook are not intended to impede necessary communications between the NRC staff and licensees, vendors, or other industry representatives, organizations, or persons outside the NRC in the development of initial NRC staff regulatory or technical findings, preparation of bulletins and information notices, evaluation of events at facilities, enforcement

## **Information Not Requiring Approval Before Release (B) (continued)**

findings, or the collection, analysis, and verification of information in the normal course of agency business. Accordingly, the following types of information need not receive prior approval before release:

### **Draft Research Documents (1)**

Draft research reports, studies, data, or other documentation based on information obtained from a licensee or vendor, that may be discussed or exchanged with those parties and other participants in a study or research program, are not subject to restraint under this directive and handbook. However, trade secrets and commercial or financial information obtained from a person and privileged or confidential information may not be released to the public without the express permission of the owner of the information.

### **Draft Agreement State Documents (2)**

Draft proposed and final rules, policy statements, and other documents provided to Agreement States are to be marked "Working Draft" and placed in the PDR when approved by the Director, Office of State Programs.

### **Draft NRC Documents to Other Federal Agencies (3)**

Draft NRC documents, except for draft inspection and enforcement documents, sent to other Federal agencies seeking their advice, recommendations, and opinions, or providing advance notice to such agencies, may be discussed with and disclosed to those agencies before being made available to the general public. The Commission may require that information sent by NRC to other Federal agencies that is claimed to be a trade secret or privileged or confidential commercial or financial information be subject to inspection by that agency under a protective agreement. This exemption does not apply when the other Federal agency is or may become an NRC licensee, or when the other agency is seeking certification, a permit, or concurrence from NRC.

## **For-Comment Drafts to the Public (C)**

This directive does not apply to draft documents specifically disseminated to the public for comment, such as draft environmental impact statements, draft regulatory guides, and proposed rules.

**Drafts Not Requiring Placement  
in the Public Document Room (D)**

Drafts exchanged with licensees as part of negotiations to settle enforcement actions are not required to be placed in the PDR.

## **Part II**

### **Nonroutine Information Received From Outside Organizations and Individuals**

The purpose of this part is to ensure that records from outside organizations or individuals relating to NRC-regulated activities and responsibilities that are submitted to the staff for comment or review through nonroutine channels/means (or not through the established regulatory process) are handled in a uniform manner by the agency staff and that they are available, when appropriate, to the public.

#### **Receipt of Records Not Related to the Official Docket (A)**

Periodically NRC staff members receive records from outside organizations or individuals relating to NRC-regulated activities or responsibilities that are not submitted as part of an established regulatory process, such as a licensing proceeding, rulemaking, or development of generic procedures or regulatory guides. The records may be sent to the agency as correspondence or handed to the staff by representatives of outside organizations or other individuals at meetings or conferences.

Any staff member receiving such a record must inform the individual or organization providing the record that it will be placed in the NRC PDR. If the information contains proprietary or other sensitive information, the outside organization or individual should be asked to submit the record by letter to agency management under the provisions of 10 CFR 2.790. The record should include appropriate markings and be accompanied by an affidavit providing justification as to why it should be protected from public disclosure.

### **Notification of Supervisor (B)**

The staff member receiving such a record shall promptly notify his or her supervisor that the record has been received and shall coordinate with the supervisor the agency action appropriate to the record.

### **Placement of the Record in the Public Document Room (C)**

Any record not exempt from public disclosure according to the provisions of 10 CFR 2.790 must be placed in the NRC PDR before any staff action by transmitting it to the Document Control Desk, as set forth in Part II of Handbook 3.50, "Document Management" (formerly MC 0232).

### **Placement of the Response in the Public Document Room (D)**

Any written or oral agency response to the record must be coordinated with the responder's immediate supervisor before being communicated to the outside organization or individual. A written response must be placed in the NRC PDR by transmitting it to the Document Control Desk, as set forth in Part II of Handbook 3.50, "Document Management."

## Part III

### Information Not Routinely Released to the Public

The staff will make routinely available to the public the types of information listed in the table in Part IV of this handbook to the extent that the information does not contain the following information.

Information prohibited from disclosure by statute, executive order, or regulation that includes—(1)

- Records containing classified information withheld in the interest of national security or foreign relations, pursuant to Executive Order 12356, "National Security Information" (5 U.S.C. 552(b)(1)). (a)
- Records prohibited from public disclosure under Sections 141 through 148 of The Atomic Energy Act of 1954, as amended (42 U.S.C. 2161-2168). (b)
- Records containing unclassified safeguards information that are protected from public disclosure by Section 147 of the Atomic Energy Act, as amended (42 U.S.C. 2167). (c)
- Trade secrets or other confidential financial or commercial information (i.e., proprietary information) (10 CFR 2.790(a)(4)). (d)
- Records pertaining to individuals that are protected from public disclosure by the Privacy Act of 1974 (5 U.S.C. 552(a)). (e)
- Correspondence and reports to or from the NRC that contain information or records concerning a licensee's or an applicant's physical protection or material control and accounting program for special nuclear material not otherwise designated as Safeguards Information or classified as National Security Information or Restricted Data pursuant to 10 CFR 2.790, "Public Inspections, Exemptions, Requests for Withholding" (10 CFR 73.21). (f)

**Volume 3, Part 1 – Publications, Mail, and Information Disclosure**  
**Release of Information to the Public**  
**Handbook 3.4 Part III**

---

Drafts and other predecisional interagency or intragency memoranda or letters where the information has not been released in final form that would be exempt from public disclosure under 10 CFR Part 9, "Public Records," or is subject to the provisions of Part I of this handbook. (2)

**Note:** Predecisional information refers to advice, opinions, and recommendations considered as part of the agency's deliberative process before a final decision is made.

Records not routinely publicly released for substantive policy reasons include—(3)

- Records containing information that would interfere with an investigation or inquiry if disclosed, or would reveal confidential sources or confidential information provided by a confidential source (5 U.S.C. 552(b)(7)). (a)
- Records concerning in-camera licensing proceedings. (b)
- Legal work products and other records covered by the lawyer-client privilege (5 U.S.C. 552(b)(5)). (c)
- Records sent to or received from foreign governments or other foreign sources, including those whose public disclosure is prohibited in agreements, except those records that deal with export-import licensing. (See 10 CFR 2.790(d)(2).) (d)
- Records considered during a closed meeting under the Government in the Sunshine Act (5 U.S.C. 552b). (e)
- Records permitted to be withheld from disclosure under provisions of Federal Procurement Regulations. (f)
- Financial information relating to the administration of NRC contractors. (g)
- Records relating to the formulation of the NRC budget, including the Five-Year Plan, and those relating to proposed budgetary levels for specific projects. (h)
- Records relating to investigations or inquiries by the Office of Investigations. (i)

**Volume 3, Part 1 – Publications, Mail, and Information Disclosure**  
**Release of Information to the Public**  
**Handbook 3.4 Part III**

---

- Memoranda to or from the Commissioners, their staffs, and offices reporting directly to the Commission, except as indicated in Section M of the table in Part IV of this handbook, "Documents Routinely Released to the Public." (j)
- Correspondence with other Federal agencies, except for that required to be disclosed in licensing or rulemaking proceedings, including—(k)
  - Correspondence received from other Federal agencies. (i)
  - Correspondence originated by NRC that deals with the deliberative process of another agency. (ii)
- Personnel, financial, medical, and other personal privacy information that would be exempt from disclosure if requested under the Freedom of Information Act because disclosure would constitute a clearly unwarranted invasion of personal privacy. (l)
- Drafts or other documents prepared in adjudicatory proceedings involving the deliberative process privilege of Atomic Safety and Licensing Board members which protects the judicial decisionmaking process from scrutiny outside the appellate process. (m)

Records relating to investigations or inquiries of the Office of the Inspector General, or records originated by the Inspector General. (4)

Routine administrative records not routinely released because of insufficient public interest and because their release would constitute an unwarranted administrative burden include internal agency administrative records, such as delegations of authority, requisitions, travel records, and reports from internal tracking and control systems. (5)

## **Part IV**

### **Table of NRC Documents Routinely Released to the Public**

DOCUMENTS ROUTINELY RELEASED TO THE PUBLIC

NU DOCS	P DR / LPDR	C A T E G O R I E S	G P O / N T I S	OFFICE	NUDOCS PDR/LPDR	Document is entered into the NRC Nuclear Documents System (NUDOCS). Document is placed in the NRC Public Document Room (PDR) in paper copy and available in NUDOCS microfiche at the PDR and at each power reactor and high-level waste Local Public Document Room (LPDR).
					FILE CATEGORIES	Filing code assigned to categories of documents related to nuclear facilities licensed under 10 CFR Part 50. See page 70 for a listing of Docket 50 PDR file categories.
					GPO/NTIS	Document is sold by the Government Printing Office (GPO) and the National Technical Information Service (NTIS).
					<p><b>A. Documents relating to the issuance and use of a construction permit and operating license for nuclear facilities — power reactors, research and test reactors, and fuel fabrication facilities (Part 50)</b></p> <p>1. ## **Public Document Room File Categories**

Each nuclear power reactor has its own docket number under which all documents pertaining to that facility are filed.

Each docket file is divided into categories. These categories pertain either to different aspects of the licensing process or to different document types.

### **Docket 50 Categories**

- A. Application/Construction Stage Documents and Correspondence
- B. Utility Preliminary Safety Analysis Reports (PSARs) and Amendments
- C. Utility Environmental Reports, Amendments, and Correspondence
- D. NRC Draft Environmental Statements (DESS), Final Environmental Statements (FESS), Supplements, and Correspondence
- E. NRC Safety Evaluation Reports (SERs), Supplements, and Correspondence
- F. Security, Medical, Emergency, and Fire Protection Plans, and Correspondence
- G. Legal and Adjudicatory Correspondence
- H. General Correspondence, including Citizens' Letters
- I. Financial Information

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555

May 12, 1993

OFFICE OF THE  
SECRETARY

MEMORANDUM FOR: James M. Taylor  
Executive Director for Operations

FROM: Samuel J. Chilk, Secretary

SUBJECT: SECY-93-034 - AGENCY POLICY CONCERNING PUBLIC MEETINGS HELD BY THE STAFF

The Commission (with all Commissioners agreeing) has approved the publication of a proposed policy statement in order to solicit public comment on the open staff meeting policy. The proposed policy statement should explicitly address the substantive concerns about the proposed policy raised by the American Mining Congress (AMC) in its letter of February 4, 1993 and solicit comments on AMC's concerns. In addition, the policy statement (and the Management Directive and Handbook) should make it clear that the proposed policy applies to NRC staff-sponsored/conducted meetings and not to meetings conducted by outside entities that NRC staff members might attend and participate in. The proposed policy statement, Management Directive, and Handbook should also contain an explicit waiver provision to make it clear that this meeting policy is a matter of NRC discretion and may be departed from as NRC convenience and necessity may dictate.

( EDO )

(SECY Suspense: 6/10/93)

The policy statement, Management Directive, and Handbook should be modified as necessary to address the comments and concerns on the proposed policy and submitted to the Commission for final approval.

(EDO)

(SECY Suspense: 9/30/93)

Additionally, the staff should move forward with plans to establish a toll-free recording and a public-access electronic bulletin board system (BBS) for announcement of agency meetings open to the public. Consideration should also be given to incorporating capabilities in the BBS that include the dissemination of various other public documents published by the

MEMORANDUM FOR: The Chairman  
Commissioner Rogers  
Commissioner Curtiss  
Commissioner Remick  
Commissioner de Planque

FROM: James M. Taylor  
Executive Director  
for Operations

SUBJECT: STAFF GUIDANCE ON THE DISPOSITION OF INDUSTRY  
DOCUMENTS RECEIVED THROUGH NONROUTINE  
CHANNELS

The Commission has expressed interest in the handling and disposition of documents received by the staff from industry representatives or other outside organizations and individuals. The attached Management Directive 3.4, "Public Release of Information," incorporates staff guidance for the uniform handling of such information in Part II of Handbook 3.4.

A staff member receiving such information is now to inform his or her immediate supervisor of its receipt and inform the sender that the information will be placed in the Public Document Room unless the submittal contains proprietary or other sensitive information. Any agency response shall also be placed in the Public Document Room after coordination with the staff responder's immediate supervisor.

Management Directive 3.4 also consolidates Bulletin 3203-15, "NRC Policy for Routinely Making the NRC Records Publicly Available" (January 28, 1985) and Bulletin 3203-25, "Policy on Release of Draft and Predecisional Documents and Information" (February 9, 1988), neither of which was issued as a manual chapter in the old management directive system.

Approved.

Commissioner Curtiss' Comments on SECY-93-034:

Regardless of what the current practice may be<sup>1</sup>, the staff's proposal reflected in the draft Management Directive and Handbook is a substantial extension of our currently published open staff meeting policy. For this reason, I believe that we should solicit comments on the proposal from those who will be most affected by this open meeting policy. Accordingly, I agree that prior to issuance of the proposed Management Directive and Handbook and before formal agency-wide adoption of this extended open meeting policy, the staff should prepare and publish a proposed policy statement and solicit public comment on the proposed notice/open staff meeting policy.

As to specifics, the proposed policy statement should explicitly address the substantive concerns about the proposed policy raised by the American Mining Congress (AMC) in its letter of February 4, 1993 and solicit comments on AMC's concerns. In addition, the policy statement (and the Management Directive and Handbook) should make it clear that the proposed policy applies to NRC staff-sponsored/conducted meetings and not to meetings conducted by outside entities that NRC staff members might attend and participate in. The proposed policy statement, Management Directive, and Handbook should also contain an explicit waiver provision<sup>2</sup> to make it clear that this meeting policy is wholly a matter of NRC discretion and can and will be departed from as NRC convenience and necessity may dictate. Finally, the policy statement, Management Directive, and Handbook should be modified as necessary to address the comments and concerns on the proposed policy and should be submitted to the Commission for final approval.

---

<sup>1</sup> The current practice, apparently, is sufficiently unclear that it requires the issuance of the Management Directive and Handbook on the open meeting policy that is proposed in SECY-93-034.

<sup>2</sup> The purported waiver provision in the currently-proposed management directive -- as reflected in the staff's March 31, 1993 memorandum responding to my inquiry on this matter -- is far too subtle. I would recommend that the proposed notice/meeting policy be formulated in such a way that the policy statement, Management Directive and Handbook explicitly provide that the policy may be waived (e.g., meetings can be held with less than 10 calendar days notice or no notice at all when circumstances warrant) when NRC convenience or necessity in a particular instance so requires, with the written agreement of the appropriate branch chief.
