## DETAILS OF INQUIRY

This case was initiated on March 23, 1983, at the request of the Region III Administrator to investigate an allegation that L.K. Comstock management ordered the suppression of nonconformance reports that were being filed by members of a quality control document/procedures group at the Perry Nuclear Power Plant.

### Background

While some investigative resources have been expended on this case, this matter has been overcome by other investigative priorities.

### Closure Information

Although this case warrants investigation from a potential wrongdoing perspective, in accordance with the Commission approved policy described in SECY 85-369, this case is being administratively closed by OI due to a lack of OI investigator resources.
