Re: Response to Confirmatory Action Letter/Plan of Action

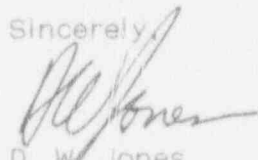

Dear Mr. Stohr:

I am in receipt of information from Mr. R. L. Flournoy that all the radioactive materials have been removed from 7214B Lockport Place in Lorton, Va, with the exception of one piece of depleted Uranium belong to Argonne National Laboratory. This letter is to let you know that it is our intention not to renew our license which expires March 30, 1994.

I understand that Mr. Flournoy has applied, or is in the process of applying, for a license to move the remaining Uranium.

Please let me know if you have any questions. We appreciate the cooperation and assistance you have given us in resolving this matter.

Sincerely,

D. W. Jones  
President
