Dear Mr. Salmon:

SUBJECT: INSPECTION REPORT NO. 50-333/94-18

This refers to the announced safety inspection conducted by Mr. R. Paolino from June 6-10, 1994, at the James A. FitzPatrick Nuclear Power Plant, located in Scriba, New York, of activities authorized by NRC License DPR-59. A summary of the inspection findings was presented to you and members of your staff at the conclusion of the inspection on June 10, 1994.

This inspection was directed towards fire protection program areas that are important to public health and safety. Areas examined during the inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of observation of activities, interviews with personnel, and review of supporting documentation.

The inspector concluded that the resolution and corrective action taken for seven previously-identified fire protection program/Appendix R open items and commitments were adequate and these items are closed. The open items reviewed were completed in accordance with established commitment schedules. The actions to address these issues were thorough and comprehensive.

No response to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,
