Reference: Letter, NRC to All Applicants with B&W Designed Nuclear Steam Supply Systems (NSSSs), subject Resolution of TMI Action Item II.K.3.5, "Automatic Trip of Reactor Coolant Pumps" Generic Letter 83-10e, dated February 8, 1983.

In the reference letter the staff requested plan and schedule information relative to resolution of the reactor coolant trip issue. This is to advise you that we will submit our plan and schedule for resolution of this issue by July 1, 1983. As requested we intend to strive for the same technical resolution of this issue as the other B&W plant owners but we expect to provide a different schedule given the current extended construction delay.
