DOCKET NUMBER
PROD. & UTIL. FAC. 70-25

To N. Palladino,

June 21, 1983

I just received Docket NO. 70-25 Order (CLI-83-15).
I Am shocked that you almost are requesting a Dossier on
each person that is requesting a Public Hearing!

I will not lower myself to respond to each of your
ridiculous questions such as the extent of my financial
interests. Suffice to say that my only interests are
my Health and my friends health and our future children's
genes.

I do hope somebody soon, that we can show a
direct relationship with the higher incidence of
cancer in the S.F. Valley and the areas of Rockwell
International and Atomics International.

I Am very upset that I need to write this
and letter of concern about Rockwell's continued
license for storing & using radioactive material.

I work within 1 mile of Rockwell and this
should be sufficient evidence regarding my PERSONAL
Interest in its continuing license.

Many people did not receive your recent Docket NO. 70-25
and I know they won't be able to respond.

But Rockwell was built before the Chesebrough Groves
became an urban area. This facility should be
moved away from a busy residential area. My
God, does it take an accident before you
people take a more stand.

I hope this letter conveys my concern
that a Public Hearing should be set up before
their license is renewed NO MATTER what
Amount Kilograms they ask for!!

Also please allow 2 months for the
proposed Hearing to be informed to the
immediate AREA.

A Constituent,
Leslee Cook
LESLEE COOK

P.S. Plus there is a high risk factor when the
transportation of this radioactive stuff is
driven down our busy streets.
