Subject: NRC letter dated 18 October 1993
License Renewals

Dear Mr. White:

This letter is to confirm our understanding and agreement that NMI will submit to the NRC, a complete license renewal package by the end of May 1994.

In telephone discussions with you, we agreed that this time is necessary to incorporate changes to the regulations into our license documents which became effective following our prior renewal submission. This time will also allow for NRC's review of our previously submitted Environmental Report, which we understand will be incorporated into the license renewal action. We will also respond by that time to all items requested in your October 1993 letter.

Thank you for your continued cooperation and assistance.

Sincerely,

Frank J. Vumbaco, Vice President,
Health and Safety
