FOIA-93-384

Attn: Mr. Dick Lavins

Dear Mr. Lavins,

This is a request under the Freedom of Information Act.

This letter constitutes my second, narrowed FOIA request discussed in the attached letter. In my earlier request, I requested the entire NEDO-23785-1-Rev. 1, 8505210454, 8505210452, 8505210451; "GESTR-LOCA-SAFER Models for the evaluation of the loss of coolant accident."

In this request, I ask that you send me the following portions of those documents:

- ☒ Sections 2.3 (pages 10-14), "Fuel Rod Mechanical Model",
- ☒ Sections X.3.2 (pages 3-22 to 3-100), "Fuel Rod Mechanical Model",
- ☒ the entire Section 5 -- (pages 5-1 to 5-6), "References",
- ☒ the entire Appendix A (Page A-1), "Zircoloy-2 Creep and Yield Stress Model."

I have attached a copy of the table of contents for these sections with the requested sections highlighted.

For the denied material, please specify which exemptions are claimed for each passage or whole document denied. Please provide a complete itemized inventory and detailed factual justification of total or partial denial of documents. For classified material denied, please include the following information: the classification rating (confidential, secret, or top secret); identify the classifier; date or event for automatic declassification, classification review or downgrading; if applicable, identify the official authorizing extension of automatic classification or review; and, if applicable, give the reason for extended classification.

If the information is denied, please issue a formal denial.

pg. vii/viii

## TABLE OF CONTENTS

1 INTRODUCTION.....	2
2 BESTR MODEL DESCRIPTION AND QUALIFICATION.....	3
2.1 General Computational Logic and Limitations.....	3
2.2 Fuel Rod Thermal Model.....	5
2.2.1 Cladding Temperatures.....	5
2.2.2 Pellet-Cladding Thermal Conductance.....	6
2.2.3 Fuel Temperatures.....	7
2.3 Fuel Rod Mechanical Model.....	10
2.3.1 Material Properties.....	10
2.3.2 Fuel and Cladding Deformation Models.....	10
2.3.3 The BESTR Mechanical Model.....	12
2.3.4 Cladding Ridging and Stress/Strain Concentration.....	14
2.4 Fission Gas Release.....	14
2.4.1 The BESTR Fission Gas Release Model.....	14
2.4.2 Comparison with Other Models.....	15
2.4.3 Comparison with Experimental Data.....	18
2.4.4 Staff Conclusion on Fission Gas Release.....	19
2.5 Fuel Rod Internal Pressure.....	19
3 BESTR MODEL APPLICATION.....	21
3.1 The BESTR-LOCA Code.....	21
3.2 Comparison with NRC Fuel Performance Codes.....	24
3.3 Other Applications of BESTR.....	25
4 CONCLUSIONS.....	27
5 REFERENCES.....	28
