OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

(9)

Dear sirs:

I have reviewed the proposed regulatory guidelines from the Federal Register, Volume 59, number 114, which is dated June 15, 1994.

I am a Nuclear Medicine Physician and Radiation Safety Officer for several hospitals in this area. I support this new rules. There is a need to revise the current thirty millicurie rule, and these new rules should result in better patient care at less cost. There should be very little problems with dose to non-medical personel.

I would hope that the new rules will be approved.

Yours truly,

Richard D. Lindgren
