RE: Proposed rule on criteria for the release of patients administered radioactive material.

Dear NRC:

The American Association of Physicists in Medicine is an association of over 3,000 medical physicists dedicated to the application of physics in medicine. The AAPM Radiation Protection Committee has asked me to request an extension of the deadline for comments on the proposed rule on criteria for the release of patients administered radioactive material. Conflict between part 20 and part 35 of 10CFR is complex and the AAPM believes additional time should be allowed for comments.

If you have any questions, please contact me.

Sincerely,

*Ravinder Nath*
