Docket No. 50-271

Mr. J. B. Sinclair
 Licensing Engineer
 Vermont Yankee Nuclear Power
 Corporation
 1671 Worcester Road
 Framingham, Massachusetts 01701

June 17, 1983

Dear Mr. Sinclair:

The Commission has issued the enclosed Order modifying the Order dated January 13, 1981, as revised by Orders dated November 25, 1981, and January 14, 1982, for the Vermont Yankee Nuclear Power Station. This Order continues in effect the exemption and extends the completion date for installation of plant modifications needed to comply with the staff's Acceptance Criteria contained in Appendix A to NUREG-0661 to not later than 90 days after the start of Fuel Cycle 10 (completion of your current 1983 refueling outage).

In accordance with your request made by letter dated June 13, 1983, this extension is granted to provide additional time to complete installation/modification of supports to the torus attached piping of the Mark I containment.

The issuance of this modifying Order provides an extension of the exemption from General Design Criterion 50 of Appendix A to 10 CFR Part 50 previously granted to the affected licensee on January 13, 1981, as modified by Orders dated November 25, 1981 and January 14, 1982.

A copy of the enclosed Order is being filed with the Office of the Federal Register for publication.

Sincerely,

ORIGINAL SIGNED BY

Domenic B. Vassallo, Chief
 Operating Reactors Branch #2
 Division of Licensing
