Box 1223 Elma, Washington 98541 (206) 482-4428

Docket No. 50-508

June 8, 1983
G03-83-463

U. S. Nuclear Regulatory Commission, Region V
Office of Inspection and Enforcement
1450 Maria Lane, Suite 260
Walnut Creek, California 94596-5368

Attention: Mr. D. M. Sternberg, Chief
Reactor Projects Branch No. 1

Subject: NRC INSPECTION AT WNP-3/5
IE REPORT NO. 50-508/82-04
VIOLATION A (NONCOMPLIANCE 50-508/82-04/01)

Reference: Letter, G03-82-1240, Mr. R. S. Leddick to Mr. D. M. Sternberg
same subject, dated December 2, 1982.

The referenced letter forwarded the Supply System final report of corrective/preventive actions and date of full compliance for the subject noncompliance (failure to fabricate and install CB&I structures in accordance with Quality Class I). During Supply System verification of corrective actions, it was found that two commitment dates listed in the report were not met as follows:

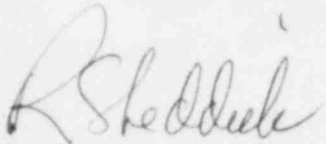

- 1) It was reported that a Certificate of Conformance to the material specification listed on the CB&I drawings would be provided by CB&I for all "A" (excluding A2 and A3) and "B" items by December 15, 1982. The Certificate of Conformance was actually provided by CB&I on April 18, 1983.
- 2) It was reported that Table 3.2-1 of the FSAR would be revised by March 30, 1983 to reflect the Quality Class G status of certain specified items. Since Table 3.2-1 also required extensive revision for additional reasons, it was considered prudent to incorporate all the changes into a single revision. Therefore, the March 30, 1983 date was not met. Due to the impending suspension of work at WNP-3, a date when the revised table can be incorporated into the FSAR cannot be established. However, a SAR Change Request has been initiated and will be processed in accordance with established procedures to assure implementation.
