

AUG 30 1994

Docket No. 50-247

Mr. Stephen Bram
Vice President - Nuclear Power
Consolidated Edison Company of
New York, Inc.
Indian Point 2 Station
Broadway and Bleakley Avenue
Buchanan, New York 10511

Dear Mr. Bram:

Subject: Inspection No. 50-247/94-14 (08/08-12/94)

This letter refers to the above subject safeguards inspection of Indian Point Nuclear Station, Unit 2, by Mr. R. J. Albert of this office. Areas examined are described in the enclosed report. Within these areas, the inspection consisted of observations of activities, interviews, and selective examinations of procedures and records. Our preliminary findings were discussed with Mr. J. Mcavoy and other members of your staff at the conclusion of the inspection.

Our inspection found your security program to be directed toward protecting public health and safety. However, a potential weakness was identified in certain aspects of your contingency response capability. In addition, long-standing assessment-aid issues are still pending permanent resolution. Both of these areas warrant attention to sustain effective station security. However, no violations of regulatory requirements were identified.

Parts of the enclosed report contain security program details exempt from public disclosure in accordance with 10 CFR 73.21 (Safeguards Information). Those portions will not be placed in the NRC Public Document Room and will receive limited distribution. This letter and the rest of the report will be placed in the Public Document Room in accordance with 10 CFR 2.790(a).

Thank you for your cooperation.

Sincerely,

Original Signed By:
James H. Joyner
