Re: Docket No.: 70-3070
Louisiana Energy Services
Claiborne Enrichment Center
Physical Security Plan
Material Control and Accounting
File: MTS-6046-00-2001.01

Dear Mr. Sherr:

This is in response to your letter dated February 21, 1991 concerning the Louisiana Energy Services (LES) Physical Security Plan (PSP) and Material Control and Accounting (MC&A) information. The PSP will be modified to specifically address radiological sabotage in accordance with 10 CFR Part 73.40(a). The changes to the PSP addressing radiological sabotage will be made along with any changes needed to improve its inspectability and enforceability.

LES will be submitting a Fundamental Nuclear Material Control (FNMC) Plan in accordance with proposed 10 CFR Part 74.33(h)(1) approximately 30 days after publication of the final rule on safeguards for uranium enrichment facilities published for comment on December 17, 1990 (55 Fed Reg 51726 (1990)) or June 1, 1991, whichever is later. The FNMC will include LES' plans for precluding and/or detecting unauthorized production of enriched uranium.

Please do not hesitate to call me at (704) 373-8466 if there are any questions concerning this.
