MAR 14 1991

St. Mary's Medical Center  
ATTN: Fred Fraizer, Vice-President  
830 South Jefferson Avenue  
Saginaw, MI 48601

License No. 21-03646-04  
Docket No. 030-17056

Gentlemen:

This refers to the routine safety inspection conducted by Mr. B. A. Parker of this office on March 1, 1991, of activities authorized by NRC Byproduct Material License No. 21-03646-04, and to the discussion of our findings with you and members of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they pertain to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letters dated January 18, 1990, and June 8, 1990, regarding violations found during our October 17, 1989, and April 4-5, 1990, inspections, respectively. We have no further questions regarding these matters.

During this inspection, certain of your activities appear to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosure, and your response to this letter will be placed in the NRC Public Document Room.

The response directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Roy J. Caniano, Chief  
Nuclear Materials Safety  
Section 2
