Mr. Charles MacDonald, Chief  
Transportation Certification Branch  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Subject: HNDC Model HN-100 Series 1  
Radioactive Materials Package  
Certificate of Compliance No. 9086  
Application for Renewal

Dear Mr. MacDonald:

Pursuant to our July 23, 1982 application for the renewal of Certificate of Compliance No. 9086, the following documentation is submitted for your consideration.

"Safety Analysis Report for the HN-100 Series 1 Radwaste Shipping Cask", STD-R-02-006, Rev. 2 (eight copies each)

Hittman Nuclear & Development Corporation Drawing Nos.: STD-02-028, Rev. 7; STD-02-029, Rev. 5; and STD-02-030, Rev. 4. (eight copies each)

Drawing STD-02-028, Rev. 7, has been changed to include the tolerances on the primary and secondary lid closures from the fabrication drawings. These tolerances are tighter than the general tolerance shown on the title block of the drawing. Page 4-4 and 4-5 of the Safety Analysis Report have been revised to show the gasket compression under the most adverse tolerances.

It is noted that the attached documents are stamped "Proprietary" and bear notices relative to the further dissemination and use of this information. HITTMAN has no objection to the filing of this material in the Nuclear Regulatory Commission Public Document Room provided that the notices remain on file with this material.

Very truly yours,

*Charles W. Mallory*
