Reactor Regulation (NRR)

Approved by: William J. McGuire 4/9/91
D. R. McGuire, Chief Date Signed
Safeguards Section
Nuclear Materials Safety and Safeguards Branch
Division of Radiation Safety and Safeguards

SUMMARY

Scope:

This routine, unannounced inspection was conducted in the areas of Physical Security Program for Power Reactors: Management Support; Security Program Plans; Physical Barriers - Vital Areas; Security System Power Supply; Lighting; and Assessment Aids. Regional Initiatives included inspection in the areas of: Management Effectiveness - Security Program; Security Program Audits; Physical Barriers - Protected Areas; Access Control - Personnel, Packages and Vehicles; Detection Aids - Protected Area; Detection Aids - Vital Areas; and Alarm Stations.

Results:

In the areas inspected, violations or deviations were not identified. Observation and assessment of ongoing security operational activities revealed that the management and operational effectiveness of the security program noted during previous inspections was being sustained. Security personnel continued to demonstrate professionalism and dedication in the performance of routine duties. Continued support of the security program by senior management was demonstrated by the procurement and implementation of additional equipment to enhance security effectiveness, including new 10MM semi-automatic pistols, laser tactical training equipment, and computerized "call-out" and "Security Badging" equipment.
