

IDENTICAL LETTER ADDRESSED TO ALL OF THE REGION III FACILITIES

Addressees - Letter Dated September 13, 1994

SUBJECT: MOTOR-OPERATED VALVE ISSUES WITH SPECIAL EMPHASIS ON THE PROCESS FOR CLOSING OUT GENERIC LETTER 89-10

I am extending an invitation to all Region III licensees to participate with Region III and NRR in a discussion of Generic Letter (GL) 89-10 motor-operated valve issues. Special emphasis will be placed on the process of closing out GL 89-10. During the recent Midwest Nuclear Engineering Manager's Forum, Mr. Geoff Wright, Engineering Branch Chief, discussed the GL 89-10 closure process with engineering managers and determined that a meeting to discuss the NRC's expectations relative to GL 89-10 was appropriate.

The meeting will be held on Tuesday, October 18, 1994 from 8:00 am to 5:00 pm at the NRC Region III office, 801 Warrenville Road, Lisle, Illinois. The meeting will be attended by NRC Region III and NRR staff. All licensee staff associated with the GL 89-10 program are invited to attend.

To make the meeting as productive as possible, please provide a preliminary list of questions/issues to John Jacobson and indicate your intention to attend by October 4, 1994. Your questions and issues will form the basis for additional discussion. We will also consider any requests for licensee presentations.

If you have any questions regarding the meeting details, please contact John Jacobson at (708) 829-9736.

Sincerely,

/s/ G. C. Wright (for)

Geoffrey E. Grant, Director  
Division of Reactor Safety
