ATTN: Chief, Planning, Program, and Management Support Branch

Subject: A Topical Report on the Methodology, Verification, and Applications of
Computer Program, GAPPIPE, RLCA/P94/04-94/009, June 1, 1994.

Dear Gentlemen:

On July 22, 1994, we sent the subject topical report to the NRC for review. As proscribed, 23 copies of the proprietary version and 12 copies of the nonproprietary version were sent.

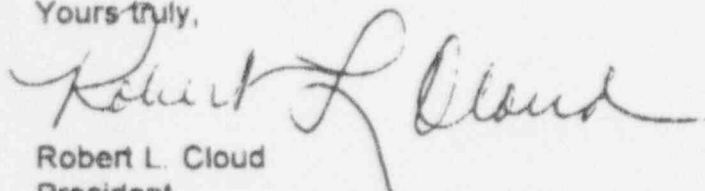

In a telephone conversation on August 16, 1994, Mr. Terry Chen requested a limited release from the copyright protection of the report. The purpose of this letter is to give the requested release.

NRC may copy the proprietary version of the subject report for internal NRC use in the review of the report. The proprietary nature of the report is to continue to be respected.

The nonproprietary version of the report will go into the NRC public document room. It is permissible for visitors to the public document room to copy the nonproprietary report.

I trust this will meet your needs.

Yours truly,

Robert L. Cloud
President
