

September 14, 1994

LICENSEE: Georgia Power Company, et al.

FACILITY: Hatch Nuclear Plant, Units 1 and 2

SUBJECT: SUMMARY OF SEPTEMBER 1 AND 2, 1994, MEETING WITH GEORGIA POWER COMPANY ON IMPROVED TECHNICAL SPECIFICATIONS - EDWIN I. HATCH NUCLEAR PLANT, UNITS 1 AND 2 (TAC NOs. M87310 AND M87311)

On September 1 and 2, 1994, the NRC staff met with the Georgia Power Company (GPC or licensee) representative and its consultant from Excel Services, Inc. The purpose of the meeting was to discuss with the staff the Hatch Technical Specification (TS) conversion process and GPC's submittal dated February 25, 1994, as supplemented July 8 and August 8, 1994, to revise the current Hatch Plant TS. The revision is required to make the current Hatch TS consistent with the Standard Technical Specifications (STS) issued as NUREG-1433, "Standard Technical Specifications, General Electric Plants, BWR/4," dated September 1992. The meeting was held in Rockville, Maryland. The attendees are listed in Enclosure 1.

After brief introductory remarks, the working meeting focused on some of the details of the February 25, 1994, submittal as supplemented July 8 and August 8, 1994. GPC agreed to revise the above submittals to incorporate its resolution of the comments made by the staff regarding deviations from NUREG-1433 and the current Hatch TS.
