(2) R. A. Clark letter to W. G. Council, dated March 11, 1983.

Gentlemen:

Haddam Neck Plant
 Millstone Nuclear Power Station, Unit Nos. 1 and 2
Non-Radiological Environmental Reporting

By References (1) and (2), the NRC Staff issued license amendments to DPR-61 for the Haddam Neck Plant and DPR-21 and DPR-65 for the Millstone Nuclear Power Station, Unit Nos. 1 and 2, respectively. The amendments delete the non-radiological water quality-related Environmental Technical Specifications from each plant's license.

The Staff documented their desire to continue to remain informed of changes to each plant's National Pollutant Discharge Elimination System (NPDES) permit and any violations of this permit. As such, Connecticut Yankee Atomic Power Company (CYAPCO), on behalf of the Haddam Neck Plant, and Northeast Nuclear Energy Company (NNECO), on behalf of Millstone Unit Nos. 1 and 2, hereby commit to provide the Staff with copies of changes to and violations of the NPDES permit for each plant submitted to and approved by the Connecticut Department of Environmental Protection. As requested, these copies will be submitted to the appropriate Regional Administrator as well as the Director, Office of Nuclear Reactor Regulation.

Very truly yours,

CONNECTICUT YANKEE ATOMIC POWER COMPANY
 NORTHEAST NUCLEAR ENERGY COMPANY
