

Portland General Electric Company

April 26, 1991

James E. Cross Vice President, Nuclear

Trojan Nuclear Plant
Docket 50-344
License NPF-1

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington DC 20555

Dear Sirs:

Trojan Reactor Vessel Radiation Surveillance Program

In accordance with Section III.A of Appendix H to Title 10 of the Code of Federal Regulations, Part 50 (10 CFR 50), a summary technical report is required to be submitted within one year after surveillance capsule withdrawal. Attached is the summary report for radiation specimen Capsule V which was withdrawn from the Trojan reactor vessel on April 14, 1990 at 7.89 equivalent full-power years (EFPY). This report was received from our vendor on April 13, 1991. The submittal of this report was discussed with the Trojan Project Manager on April 18, 1991.

Please note Section 7 and Appendix B of the report identify changes to the surveillance capsule removal schedule and the heatup and cooldown limit curves, respectively. A License Change Application to incorporate the revised schedule and curves in the Technical Specifications will be submitted within 4 months of Nuclear Regulatory Commission approval of Portland General Electric Company's (PGE's) March 13, 1991, Supplemental Response to Generic Letter 88-11, "NRC Position on Radiation Embrittlement of Reactor Vessel Materials and Its Impact on Plant Operations".

Sincerely,

Attachment
