Docket No. 50-409

APR 12 1983

Dairyland Power Cooperative
 ATTN: Mr. Frank Linder
 General Manager
 P.O. Box 817
 2615 East Avenue South
 La Crosse, Wisconsin 54601

Gentlemen:

Thank you for your letter dated March 15, 1983 (LAC-8941), which provided your basis for not paying the Class II fee of \$1,200 requested in our letters dated January 18 and March 14, 1983. The requested fee was for a June 9, 1982 (LAC-8335) Technical Specification addition for Containment Ventilation Isolation Valve Leakage Tests for the La Crosse Boiling Water Reactor.

While the Office of Nuclear Reactor Regulation (ONRR) staff agree that the Technical Specification change was requested by NRC and has little or no safety significance, they do not agree that it was requested to simplify or clarify the license or Technical Specifications for the convenience of the NRC. Rather, it was requested for the purpose of detecting excessive degradation of the Containment Ventilation System dampers. Although other licensees have basically paid or are being requested to pay Class III fees for their applications on the same subject, it is our understanding from the ONRR staff that the Class II fee is appropriate for your application for the La Crosse facility because of its nature.

Based on the above, it is requested that you remit the sum of \$1,200 to this office within fifteen days after your receipt of this letter.

Sincerely,

Original Signed by
 Wm. O. Miller
