POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2

In response to Mr. R. B. Holtzman's routine announced inspection of our Point Beach Nuclear Plant's Radiological Environmental Monitoring Program (REMP) on May 16-17, 1990, Wisconsin Electric agreed to supply the NRC with a copy of the year-end REMP analytical results as well as the results of the vendors QA/QC program of interlaboratory and intralaboratory comparisons in order to aid the NRC in its evaluation of the REMP (Report No. 50-266/90011 [DRSS]; No. 50-301/90011 [DRSS], page 3).

Enclosed are one copy of the January - December 1990 report from Teledyne Isotopes Midwest Laboratory (TIML) and one copy of Appendix A from the January 1991 report which contains the annual TIML QA/QC results.
